---

Frontend-focused Software Developer with 5+ years of experience building modern, scalable web applications. Skilled in Vue.js, Nuxt, Next.js, Tailwind CSS, and no-code tools like WeWeb. I've worked with global teams to deliver clean, maintainable code and user-first solutions. Passionate about tech, collaboration, and continuous learning.

## WORK EXPERIENCE

---

### **nocode rebels • Austin, Texas, United States (Remote) • 07/2024 - Present**

#### **Front-End Developer • Full-time**

As a Frontend Developer at NoCode Rebels, I specialize in building dynamic, scalable, and responsive web applications using low-code and no-code platforms like **WeWeb**, integrated with **Vue.js** for custom functionality. Working with a global team, I collaborate closely with designers, backend developers, and project managers to deliver pixel-perfect user interfaces and seamless user experiences for international clients, including U.S.-based startups and enterprises.

Key contributions:

- Developed and maintained complex frontend components using **Vue.js**, **JavaScript (ES6+)**, and **Tailwind CSS**.
- Integrated RESTful APIs and third-party services to extend functionality across platforms.
- Built custom WeWeb components to meet unique client requirements, enhancing flexibility and performance.
- Implemented responsive designs and UX best practices for desktop and mobile users.
- Contributed to CI/CD workflows, ensuring efficient deployment and delivery cycles.
- Participated in code reviews, QA testing, and performance optimizations.

This role has allowed me to blend traditional frontend development with innovative no-code strategies—accelerating delivery without compromising quality or maintainability.

### **Inisev • Pietà, Malta (Remote) • 05/2023 - 06/2024**

#### **Front-End Developer**

- Developed user interfaces in compliance with provided designs, leveraging Nuxt3, SCSS, and Tailwind CSS to ensure seamless user experiences.
- Conducted comprehensive code reviews to guarantee accuracy and alignment with company standards, fostering high-quality deliverables.
- Delegated tasks effectively among team members, optimizing workflow efficiency and ensuring timely project completion.
- Contributed to the redesign initiative of follow.it, a pioneering service aimed at enhancing website traffic through proactive follower notifications, consolidating news and blog subscriptions for streamlined user engagement. With the new redesign, the user experience has increased significantly for the 10M+ users on the platform.

### **Soop • Auckland, New Zealand (Remote) • 01/2021 - 04/2023**

#### **Full-Stack Engineer**

- Spearheaded the design and implementation of the frontend for the Food Hygiene Management SPA, optimizing user experience and functionality.
- Executed comprehensive code testing using Cypress for E2E testing, ensuring robustness and reliability of the application.
- Established code coverage metrics with Codecov, enhancing code quality and facilitating thorough test analysis.

- Collaborated closely in the design and development of REST APIs, contributing to the creation of scalable and efficient backend solutions.

### **Identigate Integrated Solutions • Nairobi, Kenya. (Hybrid) • 10/2022 - 03/2023**

#### **Mid-level Software Engineer**

- Spearheaded the conception, development, and successful deployment of dynamic web applications leveraging Vue.js for frontend excellence and Laravel for robust backend functionality.
- Pioneered the setup and configuration of the production server for Assetfix, a Laravel-based asset management application, ensuring optimal performance and reliability from inception to deployment.
- Revolutionized project workflow efficiency by orchestrating the seamless CI/CD pipelines using GitHub Actions, enhancing collaboration and accelerating time-to-market.
- Collaborated closely with cross-functional teams to gather requirements, architect solutions, and implement features that elevate user experiences and drive business objectives.
- Implemented and optimized RESTful APIs to facilitate smooth communication between frontend and backend systems, enhancing scalability and flexibility.
- Conducted thorough testing and debugging to ensure the delivery of high-quality, error-free software solutions, meeting stringent performance and security standards.

### **Soop • Auckland, New Zealand • 09/2020 - 12/2020**

#### **Full-Stack Developer - Intern**

- Orchestrated the development of user interfaces in alignment with provided designs, prioritizing aesthetic appeal and user-centric functionality.
- Engineered comprehensive CRUD operations for diverse resources, empowering seamless functionality within the interface and enhancing user interaction.

## **EDUCATION**

---

### **Bachelor's degree in Information Technology**

Jomo Kenyatta University of Agriculture and Technology (JKUAT)

## **SKILLS**

---

WeWeb, Vuejs, React.js, Next.js, Nuxt.js, Nodejs, MongoDB, NestJS, Knock, Pipedream, Web Performance, Optimization Techniques, Tailwind CSS, MySQL, Vuex, jQuery, Git, SASS, Pinia, React Query, Redux
